DETAILED ACTION

Response to Amendment

1. The applicants' amendment filed on 6/27/03 (Paper No. 15) has been fully considered and made of record.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

3. Claims 7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Helm 4,512,828.

Helm discloses a wire harness loosening jig in combination with a wire harness comprising: a base plate (guide rail 34); a fixing-side clamping portion having a first pair of clamps (clamping mechanism 56 in Fig. 1) and attached to the base plate for clamping one end of a wire harness (cable 21); a guide rail (rail 186) attached to the base plate and extending in a longitudinal direction of the wire harness 21; a movable-side clamping portion having a second pair of clamps (clamping mechanism 54) arranged with the guide rail; clampers (pivotal connectors 104 on both 54 and 56) arranged to shift one of the first pair of clamps and one of the second pair of clamps in a radial direction (open/close positions of 54 and 56) of the wire harness to clamp the wire harness; and a drive mechanism (hydraulic system 72) which enables the movable-side clamping portion 54 to move towards or away from the fixing-side clamping portion 56 (see col. 4, lines 10-25). The structure of the movable-side clamping portion 54 is capable of performing the function of "for clamping...loosened." (lines 6-9 of Claim 7).

Art Unit: 3729

Regarding Claim 9 and the “wherein...” (last 4 lines of Claim 9) clause, Helm teaches a driving mechanism 72 which includes a screw shaft (member 186), a bearing (clamp 188), a motor 74 and a lever 92.

Response to Arguments

4. Applicant's arguments filed 6/27/03 (Paper No. 15) have been fully considered and have been considered to met and inclusive of the rejection set forth above. Particularly now that the base plate of Helm can be read as guide rail 34, which is considered to be a “thin flat piece of metal”, and that the claimed guide rail can be read as rail 186.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
